

INDUSTRY 4.0

Victor Series

With the advent of the era of industrial 4.0, the degree of automation is higher and higher. In our field, the application of automatic welding is more and more widely. The beveling for automatic welding required: OD Beveling, Facing and Internal beveling. As the pioneer in China, NODHA is proud to push the "Victor" Series to the market.

1/ Cutter can hold 3 tool bits process in one time. Automatic welding requires the OD Beveling, facing and internal beveling. Only 3 side processing finish in one time can guarantee the precision of beveling. The cutter can install 3 pcs tool bits, meet the demands.

2/ New expanding structure. New designed expanding structure makes the fix more stable. And low failure rate.

3/ New-design main shaft fixation. There will be smaller gap of the machine. Performs beveling more smooth, less vibration.
